

WORK SAFELY AND SECURELY WHEN SERVICING VEHICLES

A fully adjustable, lightweight fall prevention working platform designed to prevent workers from falling into inspection pits when servicing vehicles.

INNOVATIVE PATENTED SAFETY SOLUTIONS

INSPECTION PIT COVER

KEY FEATURES & BENEFITS

- ▶ Lightweight system formulated with aluminum
- ▶ Highly adaptable – adjusts in both width and length; a perfect fit every time
- ▶ Robust pit cover designed to hold operatives weight

PitProtect has been designed to keep operatives safe by preventing falls into inspection pits and voids when servicing vehicles. The cover is constructed from aluminum and has a concertina design, making it easy to open and close. The system is lightweight, but strong enough to support operatives weight. The cover can be used as a working platform as well as a fall prevention system.

The system is ready to go with no training needed and has been designed to be fully adjustable in both length and width. Each bar can be set at a different width so is suitable for covering a pit that's uneven in width, ensuring a perfect fit for any job.

The PitProtect system conforms to BS.8630.2019 safety standards and comes in three sizes, the Pit Protect 1100, 1300 and 1500.

SPECIFICATION

PIT PROTECT 1100

Closed size	0.45m x 0.9m
Open size	2m long and has a width size of between 0.9m and 1.1m
Weight	19.4kg

PIT PROTECT 1300

Closed size	0.45m x 1.1m
Open size	2m long and has a width size of between 1.1m and 1.3m
Weight	21.1kg

PIT PROTECT 1500

Closed size	0.45m x 1.3m
Open size	2m long and has a width size of between 1.3m and 1.5m
Weight	24.4kg

Installation, training and maintenance packages are available.
